

## Scalar i40/i80

Bringing iLayer Benefits to Small and Medium-Sized Businesses

The Quantum Scalar® i40 and i80 libraries are the easy-to-use tape libraries for the growing storage needs of small and medium-sized businesses, as well as remote office environments of larger enterprises. The Scalar i40 and i80 save time by simplifying everything from initial setup and ongoing management, to adding capacity over time.

The Scalar i40 and i80 include Quantum's iLayer™ software, which provides best-in-class management and monitoring capabilities. iLayer software, shipped in over 45,000 Quantum Scalar libraries, typically reduces library management time by more than 50%. iLayer's easy-to-use interface can reduce business expenses because it does not require a dedicated full-time technical staff member to keep the library up and running smoothly and reliably.

iLayer includes proactive diagnostics, which has been shown to reduce service calls by 50%. Proactive diagnostics provide easy-to-understand messages with specific corrective actions, allowing users to avoid downtime and spend more time doing other things besides managing the tape environment.

Keeping up with data growth is simplified with the Scalar i40 and i80 tape libraries. The COD (Capacity-on-Demand) scalability feature enables the library's capacity to grow on demand with users' data—without disruption. Start with 25 slots and scale up to 40 slots with Scalar i40 (50 slots up to 80 slots for Scalar i80) as your requirements grow, with a software license only—no hardware to purchase or install—providing market-leading investment protection.

To keep your sensitive data or proprietary corporate intellectual property safe, and to meet the increasing government requirements for compliance, both the Scalar i40 and i80 support the US Federal government-recommended encryption standard for the highest levels of security. Tape encryption ensures your data is protected even while being stored offsite.

The Scalar i40 and i80 provide significant benefits over conventional entry-level tape automation products, including better investment protection and less time managing the tape environment. All this, with the confidence of knowing that over 45,000 Scalar libraries with iLayer software have shipped, makes the Scalar i40/i80 the intelligent choice.

### AUTOMATION

**SCALAR i40 PROVIDES 25 TO 40 SLOTS**

**SCALAR i80 PROVIDES 50 TO 80 SLOTS**

**SIMPLE CAPACITY-ON-DEMAND SCALABILITY**

**SIMPLIFIED MANAGEMENT WITH iLAYER FEATURES**

**HIGHEST LEVEL ENCRYPTION STANDARD**

### FEATURES AND BENEFITS

- **Simplicity** – The simplest possible installation, operation and scaling
- **Investment Protection** – Capacity-on-Demand feature enables easy in-box expansion
- **Time Savings** – iLayer intelligent management simplifies library management, freeing up valuable time
- **Increased Reliability** – Industry-leading Reliability Availability Serviceability (RAS) features and proactive monitoring have proven to reduce service calls 50%
- **Compliance and Security** – Supports government-level security with the highest-level AES 256-Bit Encryption Standard
- **KMIP 1.0 Compliance** – Supports Safenet's KeySecure Servers (K150, K460) via KMIP protocol
- **Scalar LTFS** – Appliance that presents tapes as NAS storage, enabling new ways to manage and access archive files

COMPLIANCE AND CERTIFICATION

<b>Safety Standards:</b>	IEC 60950 with all world-wide country deviations
<b>Emission Standards:</b>	Class A of FCC part 15, ICES-003, CISPR 22, EN55022 Class A, VCCI, CNS 13438, KN22, AS/NZS CISPR 22, EN61000-3-2, and EN61000-3-3
<b>Immunity Standards:</b>	EN55024, KN24
<b>International Certifications:</b>	CE (Europe), VCCI (Japan), GS (Germany), FCC (USA), ICES (Canada), NRTL (USA & Canada), GOST (Russia), BSMI (Taiwan), KCC (Korea)

ENVIRONMENT

<b>Electrical:</b>	100-240 VAC, 50-60Hz
<b>Temperature:</b>	10 to 35°C operating
<b>Humidity:</b>	20 to 80% non-condensing, operating

RELIABILITY

<b>Library MSBF:</b>	Greater than 2,000,000
<b>Library MTTR:</b>	Less than 30 minutes
<b>Power:</b>	Optional 2N power available on i80 models
<b>Diagnostics:</b>	Embedded monitoring of major library subsystems, self-diagnostic procedures, and policy-based email and pager alerts to system administrators and Quantum Global Services

COMPATIBILITY

The Scalar i40 and i80 have broad compatibility with storage software and hardware components. Consult the most recent Quantum Compatibility Guide on [www.quantum.com](http://www.quantum.com) for a complete list.

SERVICES AND SUPPORT

**StorageCare® Guardian:**  
Delivers proactive monitoring and integrated RAS notification, which sends email alerts to your designated operator for rapid problem resolution.

**Warranty:**  
One Year, 5x9 Phone Support with Next Business Day CRU replacement and on-site FRU replacement. Additional service contract upgrade response levels are also available. The Scalar i40 and i80 are customer installable; however, installation and integration services are available.

ABOUT QUANTUM

Quantum is a proven global expert in Data Protection and Big Data management, providing specialized storage solutions for physical, virtual and cloud environments. From small businesses to major enterprises, more than 50,000 customers trust Quantum to help maximize the value of their data by protecting and preserving it over its entire lifecycle. With Quantum, customers can Be Certain they're able to adapt in a changing world – keeping more data longer, bridging from today to tomorrow, and reducing costs.
